

# A Wonderful Clock.

There is now in the possession of, and manufactured by, Mr. COLLINGS, Silversmith, Market Place, Thornbury, Gloucestershire, a most ingenious piece of mechanism—an eight day clock, with dead-beat escapement, maintaining power, chimes the quarters, plays sixteen tunes, plays three tunes in twelve hours, or will play at any time required. The hands go round as follows:—one, once a minnte; one, once an hour; one, once a week; one, once a month; one, once a year; it shows the moon's age, the time of rising and setting of the sun, the time of high and low water, half ebb and half flood, and by a beautiful contrivance, there is a part which represents the water which rises and falls, lifting the ships at high-water tide as it were in motion, and as it recedes leaves these little automaton ships dry on the sands. It shows the hour of the day, day of the week, day of the month, month of the year; in the day of the month there is a provision made for the long and the short months. It shows the twelve signs of the Zodiac; it strikes or not, chimes or not, as you wish it, it has the Equation table, showing the difference of clock and sun every day in the year. Every portion of the clock is of beautiful workmanship, and performs most accurately the many different objects which are called into action by the ingenious proprietor, who is most willing to describe all its various achievements to anyone who may feel a pleasure in paying him a visit.
